

AMAZE
micro collagen peptides

Micro Collagen Peptides

Living your best life consists of feeling great and looking great. This includes being able to enjoy youthful skin, healthy hair and nails, and mobility.

As functional parts of almost every cell in the body, collagen proteins help cells fulfill their most basic purposes and you can help to maintain and even restore these benefits with HealthyHome's **AMAZE micro collagen peptides**.

Over time we produce less collagen naturally, and some issues become more pronounced: *wrinkled skin, weakened hair and nails, and discomfort in joints.*

Thankfully, replenishing collagen levels—through lifestyle choices and proper supplementation—is within reach. One of the best ways is to add clean, all-natural collagen to your routine, bolstering the body's capacity to create more of this important cellular structure to help you look and feel your best.

The Amazing Ingredients in Amaze

Marine Collagen

One of the cleanest collagen ingredients available. Supports skin elasticity and hydration.

Ceramide

Helps increase skin moisture. Clinical studies have shown that an oral phytoceramide dramatically hydrates, smooths, and rejuvenates aging and wrinkled skin.

White Versailles

Brightens skin tone, reduces spots, fights against signs of aging. High level of antioxidant activity, assists against dark spots, revives dull skin.

Hyaluronic Acid

Many benefits, especially to eyes, joints, and skin. Additionally, it helps increase skin moisture and reduce the appearance of fine lines and wrinkles.

Exceptional Delivery System

HealthyHome uses Microzen Technology, which allows our collagen to have increased absorption compared to other collagen products of the market. Microzen Technology provides micro sized collagen peptides, meaning AMAZE's liquid microparticles may provide higher bioavailability and absorption than regular collagen.

PARTICLE FUNCTIONAL SIZE

APPROX 1-3 MCM

RED BLOOD CELL SIZE

APPROX 7.5-8.7 MCM

Collagen Facts

- Collagen accounts for **30%** of your body's overall protein
- Connective tissues—**skin, hair, bones, ligaments, and joints**—are composed of collagen
- Research confirms that collagen supports **major organ function**
- After age 20, natural collagen production **decreases by 1%** each year
- **Proper supplementation** can increase production of collagen
- Randomized, controlled trials have found collagen **can increase skin elasticity and joint function** about 30%

There are 28 different known types of collagen, and Amaze Collagen contains four key types:

Type I | Makes up 90% of your body's collagen and used to provide structure to skin, bones, tendons and ligaments

Type II | Found in connective tissues of the body, provides flexibility and support to joints

Type V | Provides vital in support of healthy skin, nails, and hair

Type IX | Plays a support role in cartilage formation and function
