

PRIME
nitric oxide activator

What is Prime?

Uncover a groundbreaking discovery in cardiovascular medicine that not only protects against heart disease but also significantly slows down aging. Meet PRIME, an exclusive Nitric Oxide Booster designed for more than just heart health—it's your key to a healthier, happier home. Elevate your heart health, enhance overall wellness, and experience a longer, more youthful life with PRIME. This revolutionary supplement is carefully crafted to support optimal vascular health, offering the secret to not only living longer but also feeling younger.

Importance of Nitric Oxide:

Our arteries are the transportation highway for oxygen and nutrient-rich blood to reach every organ, tissue, and cell in our body. Nitric oxide (N-O) is the nutrient that keeps this highway wide open, flexible, and smooth for blood to flow freely. As we age, we experience a natural but dramatic decline in Nitric Oxide production. Without intervention, our arteries tend to narrow and stiffen, creating a buildup of plaque, and compromising blood flow. PRIME gives you a daily shot of powerful nutrients proven to promote N-O production and maximize blood flow.

PRIME
nitric oxide activator

PRIME N.O. Activator is the culmination of a decade of scientific research, incorporating the most potent Nitric Oxide producing plants and compounds on the planet. Tested and proven, PRIME delivers a host of benefits that redefine wellness:

How does it work?

- Promotes vasodilation (expansion of arteries and blood vessels) critical for maintaining healthy blood pressure levels, that are already in a normal range.
- Maximizes circulation by signaling the arterial smooth muscle to relax, dilating blood vessels, and improving blood flow.
- Prevents premature cardiovascular aging by promoting blood vessel flexibility and health.
- Promotes neuronal communication and blood flow to the brain, which encourages clear thinking, faster cognition, and enhanced memory recall.
- Improved blood flow leads to improvements in energy, mood, and general feelings of well-being.
- Boosts energy levels, expands arteries, improves sexual function, increases blood flow, enhance brain activity, reverse aging process.

Did you know?

- Good bacteria in the mouth initiates the conversion of nitric oxide.
- The average 40-year-old produces 50% less Nitric Oxide than at age 20.
- PRIME Contains active ingredients that enhances red blood cell formation
- B vitamins are essential for energy pathways and cell regeneration.
- Beetroot supports athletic performance, normal blood flow, and cardiovascular longevity.

The Aging Dilemma:

As you age, your body naturally produces only a fraction of the Nitric Oxide (N.O.) it did in your younger years. The consequences? Issues commonly associated with aging, such as memory loss, slower mental processing, sexual concerns, fatigue, and even heart disease.

Key Ingredients in PRIME

Beetroot Extract

Beetroot extract, derived from the root of the beet plant, is a nutritional powerhouse rich in nitrate, potassium, folate, and vitamin C. The primary mechanism of its health benefits lies in its conversion of nitrate into nitric oxide, which induces vasodilation, leading to lower blood pressure.

Quercetin

Quercetin, a plant pigment found in various foods like red wine, onions, green tea, apples, and berries, possesses antioxidant and anti-inflammatory properties. These qualities may aid in reducing inflammation, preventing heart disease, controlling blood sugar, and creating healthier cells in the body.

L- Citrulline

L-Citrulline increases plasma levels of arginine, aiding in ammonia recycling and nitric oxide metabolism, potentially benefiting vascular health, athletic performance, and erectile function.

Schisandra Fruit Extract

Schisandra fruit extract, derived from the plant native to northern China, is considered an adaptogen, believed to enhance the body's resistance to various stressors. The chemicals in Schisandra improve liver function, potentially increasing energy, endurance, and coordination.

Pomegranate Fruit Extract

Pomegranate is rich in antioxidants, and preliminary research suggests its chemicals may slow the progression of atherosclerosis and combat cancer cells. It is used for diverse conditions such as high blood pressure, heart disease, and diabetes.

Pine Bark Extract

Pine bark extract, derived from the maritime pine tree, is rich in health-promoting compounds like procyanidins, catechins, and phenolic acids, known for their antioxidant, antimicrobial, and anti-inflammatory properties.

Hawthorn Berry Extract

Hawthorn Berry Extract, derived from the tiny fruits of hawthorn trees and shrubs, is rich in antioxidants, potentially offering benefits such as lowered blood pressure, reduced cholesterol, decreased inflammation, improved skin health, and enhanced digestion.

Celery Seed Extract

Celery Seed Extract, derived from the *Apium graveolens* plant, is known for its diverse potential benefits including promoting bone health through calcium and manganese, supporting red blood cell formation for improved oxygen delivery, increasing iron levels, regulating blood sugar, providing antioxidant properties, and potentially fighting bacteria.

Supplement Facts

Servings Per Box 30

Serving Size 1 Packet (3.3g)

<i>Amount Per Serving</i>	<i>% Daily Value*</i>
Vitamin C (as Ascorbic Acid) 100mg	167%
Vitamin B12 (as methylcobalamin) 1,000mcg	16,667%
Proprietary Prime Nitric Oxide Blend 550mg	†
Beetroot extract (<i>Beta vulgaris</i>)(Root), Quercetin, L-Citrulline, Shisandra fruit extract (<i>Shisandra chinensis</i>), Pomegranate fruit extract (<i>Punica granatum L</i>), Pine Bark extract (<i>Pinus massoniana. lamb</i>), Hawthorn Berry extract (<i>Crataegus pinnatifida</i>), Celery Seed extract (<i>Apium graveolens</i>).	

† Daily Value (DV) not established

Store in a cool, dry place.
